

# Energy Safety Canada Fall Protection

Outline	Learning Objectives
<p>This comprehensive fall protection training was developed to meet the highest standards for training in most Canadian jurisdictions using Canadian Standards Associations (CSA) Z259.</p> <p>Designed to educate the worker in the planning, use, care and implementation of common fall protection systems, it includes both theory and practical application exercises. Participants will engage in hands-on training activities, including inspecting, fitting, adjusting and connecting fall protection systems and components.</p> <p>While this basic course can be used as part of a worker's competency assessment, the employer must designate a worker as a "competent person" based on specific tasks assigned</p>	<ul style="list-style-type: none"> <li>• Why fall protection is important.</li> <li>• Legislative roles and responsibilities.</li> <li>• Identifying and assessing fall hazards, hierarchy of controls, and development of fall protection and safe work procedures.</li> <li>• Types of fall arrest systems, equipment and components.</li> <li>• The use, care, storage, maintenance and inspection of fall protection equipment, systems and components.</li> <li>• Fall protection system forces and clearances.</li> <li>• Effects of falls and fall rescue planning</li> </ul> <hr/> <p><b>Competencies</b></p> <p>The competencies of this program are tested through a knowledge-based examination, and through 100% participation in the program. Participants must achieve a minimum pass mark of 70% on a written competency exam, and the Certificate of Completion that is valid for three years.</p>
