Electrical Safety Program

“Product in a Box”

What is an Electrical Safety Program “Product in a Box”?

Complete, licensed Safety Management System with Arc Flash and Shock hazard management:

- Customized and implemented by you
- Apply preventive and protective control measures
- Reduce workplace risks

Compliant with CSA Z462, NFPA 70E, CSA Z1000, ANSI Z10, Certificate of Recognition (COR) and Voluntary Protection Program (VPP)

Who benefits from an Electrical Safety Program?

- Employers without an Electrical Safety Program or with an outdated program due for an audit or upgrade to the latest standards
- All employees exposed to Arc Flash and Shock risks while working on energized electrical power equipment

How does it work?

- Follow the provided instructions, customize the documentation, adopt the program, roll it out to workers, and then audit for results
- Complete the Energized Electrical Job Risk Assessment
- Danatec can assist with ESP program review, customization, implementation follow-up, regular program audits, and certified eLearning or instructor-led Arc Flash and Shock training
- **ESP PIB supports ESTS Electrical Worker and Non-Electrical Worker eLearning training at www.arcflash-training.ca**
