TRAIN SMARTER!

www.globaltrainingcentre.com

WELCOME!

Global is a Leader in the Safety Training industry. We are renowned for delivering high-quality, flexible, client-orientated Safety and Leadership training.

We train thousands of Workers each year in Job Site and Operator Safety, Industry-Specific Certification Requirements and more. Our courses meet all applicable regulatory requirements and standards in the U.S.A and Canada.

OUR COURSES

We run more than 50 courses facilitated by professional instructors. We deliver everything from day courses to full week training at our State of the Art Training Facilities in Southern Alberta or at your Site. Our site or your site, we make it work!

COSTUMIZED SOLUTIONS

Global Training Centre is recognized in the industry as not only being able to provide the best training programs, but also has the ability to customize and tailor the programs for clients. We tailor programs to your needs by incorporating your policies and procedures.

A composite background image. The top left shows a worker in a blue uniform and orange helmet on a mobile training unit with a crane. The bottom right shows a close-up of a worker in a blue uniform and orange helmet working on a large pipe. The central part of the image is a red overlay containing text and icons.

OUR COURSES

CONFINED SPACE

**BASIC CONFINED SPACE
PRE-ENTRY**

**BASIC CONFINED SPACE
PRE-ENTRY ONLINE**

**BASIC CONFINED SPACE
ENTRY**

CONFINED SPACE

BASIC CONFINED SPACE PRE-ENTRY

This half-day theory-based program is part one of the confined space series. Throughout the training, learners will focus on identifying confined spaces, understanding workers' responsibilities, conducting thorough hazard assessments, and formulating effective plans for safe entry.

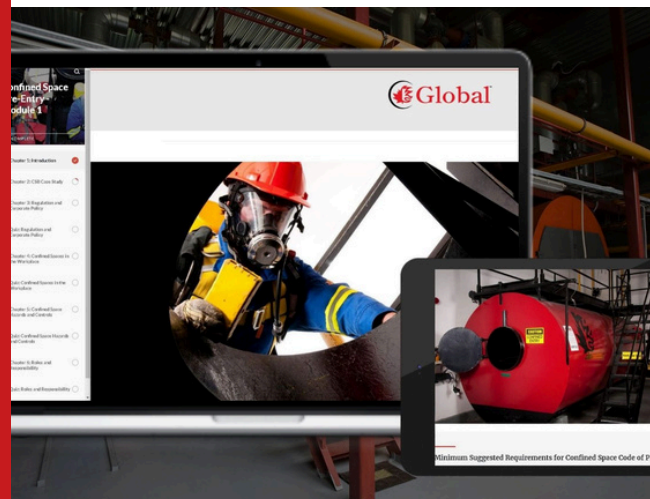

BASIC CONFINED SPACE ENTRY

This is a half-day scenario-based course, which serves as part two of our confined space training. This safety training course is specifically designed to provide participants with the knowledge and skills required for confined space entry certification while wearing a breathing apparatus.

BASIC CONFINED SPACE PRE-ENTRY ONLINE

This 3-4 hour online theory based program can be used as a standalone knowledge course or as a pre-requisite for our blended confined space option. Participants in this course will receive the necessary knowledge to identify confined spaces and the hazards that they present.

OUR COURSES

FALL PROTECTION

**INTRODUCTION TO FALL
PROTECTION**

**FALL PROTECTION
(ENERGY SAFETY CANADA)**

**FALL PROTECTION FOR THE
ACTIVE USER**

FALL PROTECTION

INTRODUCTION TO FALL PROTECTION

This half-day program develops a general understanding of what fall protection is. Emphasis is placed on equipment and techniques that instill a proactive approach to fall protection safety. The responsibilities of both employer and worker are covered, as well as the regulations governing fall protection.

FALL PROTECTION (ENERGY SAFETY CANADA)

Falls from height are among the most common causes of serious work-related injuries and deaths in the workplace. This comprehensive fall protection training was developed to meet the highest standards for training in most Canadian jurisdictions using Canadian Standards Associations (CSA) Z259.

FALL PROTECTION FOR THE ACTIVE USER

Our one-day Fall Protection for the Active User program is designed to equip participants with the necessary knowledge and skills to eliminate or mitigate fall hazards and ensure workplace safety. The program emphasizes considerations and implementation of systems and safe work practices to instill a proactive approach to fall protection.

OUR COURSES

FIRST AID

**STANDARD / INTERMEDIATE
FIRST AID & CPR**

**BLENDED STANDARD/
INTERMEDIATE FIRST AID CPR**

**RECERTIFICATION
STANDARD / INTERMEDIATE
FIRST AID CPR**

EMERGENCY / BASIC FIRST AID

**BLENDED EMERGENCY / BASIC
FIRST AID**

FIRST AID

STANDARD/INTERMEDIATE FIRST AID CPR

This two-day program covers the essential modules required for first aid certification, while providing a unique first aid training concept that utilizes less theory and workbooks, and more scenarios and practical applications.

BLENDED STANDARD / INTERMEDIATE FIRST AID

This program consists of 6 hours of online training followed by 6.75 hours of in class skill training. The program covers the essential modules required for first aid certification, while providing a unique first aid training concept that utilizes less theory and workbooks, and more scenarios and practical applications.

RECERTIFICATION STANDARD/ INTERMEDIATE FIRST AID CPR

This one-day recertification program is for individuals who currently possess a valid Standard First Aid & CPR certification. This program reviews the essential modules required for first aid certification, while providing a unique training concept.

FIRST AID

EMERGENCY/BASIC FIRST AID

This one-day program enables participants to learn basic first aid for common injuries. With this course you will be able to provide assistance to those who are facing life threatening injuries or medical conditions including choking, bleeding, shock and unconsciousness.

BLENDED EMERGENCY/BASIC FIRST AID

This program consists of 3 hours of online training followed by 4 hours of in class skill training. With this course, you will be able to provide assistance to those who are facing life threatening injuries or medical conditions including choking, bleeding, shock and unconsciousness.

OUR COURSES

FIRE TRAINING

INDUSTRIAL FIRE I EXERCISE 1

INDUSTRIAL FIRE I EXERCISE 2

INDUSTRIAL FIRE II

FIRST AID FIREFIGHTER

FIRE TRAINING

INDUSTRIAL FIRE I EXERCISE 1

This half-day program was developed to offer general knowledge in the use, care and maintenance of a 30 lb. fire extinguisher. The program includes classroom theory as well as practical training on Global's Fire Field.

INDUSTRIAL FIRE I EXERCISE 2

This half-day program was developed to offer general knowledge in the use, care and maintenance of a 30 lb. fire extinguisher. The program includes classroom theory as well as practical training on Global's Fire Field.

INDUSTRIAL FIRE II

This half-day program provides the necessary knowledge in the use, care and maintenance of 30 lb. to 350 lb. fire extinguishers. The program includes classroom theory as well as practical training on Global's Fire Field.

FIRE TRAINING

FIRST AID FIREFIGHTER

This half-day program is designed to meet the needs of a Fire Warden Program, or for personnel in need of very basic training on 30 lb. dry chemical fire extinguisher operations. The program includes classroom theory as well as practical training on Global's Fire Field.

HAZARDOUS ATMOSPHERE

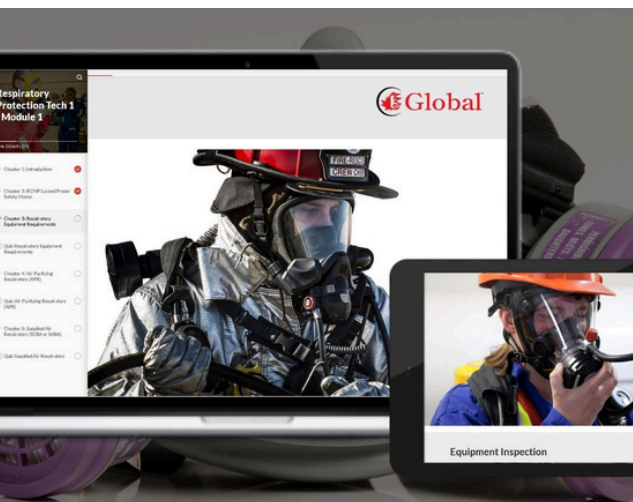

GAS DETECTION TECH I - ONLINE

This online program covers all the components of gas testing, including hand-held detectors, single toxic gas monitors, multi gas monitors, continuous gas monitors and LEL monitors.

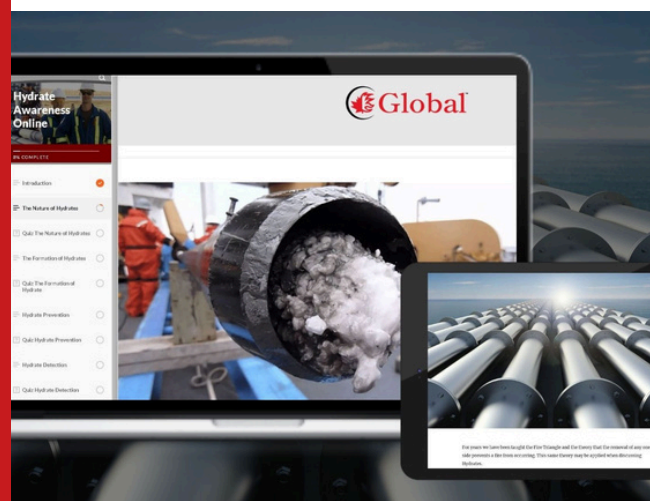

RESPIRATORY PROTECTION TECH I - ONLINE

This online program gives participants basic knowledge in the use, care and maintenance of different types of respiratory protection, with emphasis on breathing apparatuses.

HYDRATE AWARENESS ONLINE

In this 1-2 hour online training course, the participant will gain the fundamental knowledge about hydrate formation. They will also be able to understand the principles of both detecting when a hydrate is present in a system and the proper procedures for dealing with them safely when found.

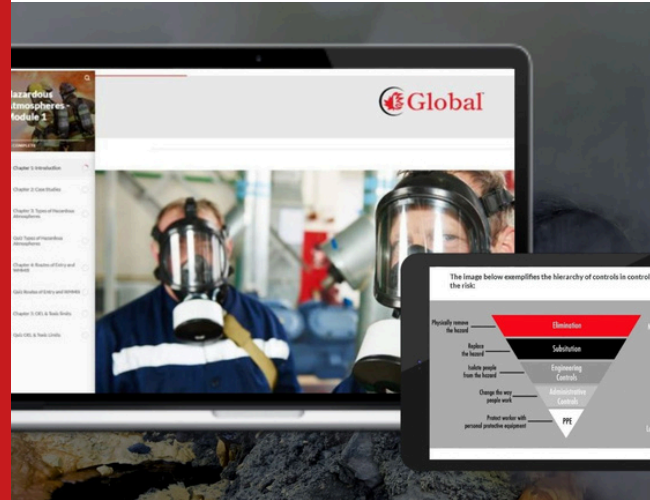

HAZARDOUS ATMOSPHERE

HAZARDOUS ATMOSPHERES ONLINE

The course examines the different preventative measures and proactive reporting methods that can be taken to eliminate or reduce the chance of an incident occurring.

HAZARD AWARENESS ONLINE TRAINING

This course helps learners identify potential hazards in the workplace using various hazard identification tools, with the goal of preventing incidents from occurring.

OCCUPATIONAL HEALTH AND SAFETY ONLINE

The online Occupational Health and Safety (OHS) course is a self-paced modular computer based training program that allows the learner to enter and exit the program at their convenience.

SIMDUT (FDS) EN LIGNE

Les cours d'apprentissage en ligne du SIMDUT de Danatec, primés et reconnus par l'industrie, sont destinés aux débutants et à la réattestation. Notre cours SIMDUT inclut le contenu du SIMDUT que les employeurs doivent encore enseigner sur le lieu de travail jusqu'en décembre 2018.

TDG ONLINE

If you're a shipper, receiver, driver, or handler this course will assure that your knowledge of the regulations behind shipping and receiving dangerous goods is up-to-date. You will receive interactive instruction with quizzes to test your knowledge and multimedia presentations for an engaging learning experience.

REGULATORY

TDG & WHMIS (GHS) ONLINE BUNDLE

This bundle pack includes both Danatec's full TDG Online Training Program and Award-Winning WHMIS Online Training Program. Successful completion will grant students personalized, colour wallet certificates for both Transportation of Dangerous Goods Training and Workplace Hazardous Materials Information System Training and a digital badge.

JOINT HEALTH & SAFETY COMMITTEES AND REPRESENTATIVES ONLINE AWARENESS

This course was developed to aid employers and employees with their transition to comply with the updated Occupational Health & Safety Act. This is only an awareness level course.

WORKPLACE VIOLENCE & HARASSMENT PREVENTION & RESPONSE (VIRTUAL)

Alberta employers are responsible to conduct hazard assessments, provide training, create prevention plans, undertake investigations and provide support to employees experiencing abuse at work. This engaging and comprehensive course covers all of the mandatory requirements and provides the tools necessary to compliance.

REGULATORY

ELECTRICAL SAFETY TRAINING SYSTEM (ESTS) FOR NON-ELECTRICAL WORKER - CANADA AND USA

Our ESTS for Non-Electrical Workers course was developed for anybody who isn't an electrical worker but has interactions with electrical systems and must understand rules and regulations. >>

BEAR AWARENESS

Utilizing interactive audio, pictures, narrations, simulations, videos, quizzes and a final exam. The Bear Essentials will equip individuals with the knowledge of the types of bears in Alberta, their habits and habitat, and how you can keep safe when venturing into bear country for work or play. >>

ON DEMAND

GAS TESTING CERTIFICATION

This half-day program covers all the components of gas testing, including hand-held detectors, single toxic gas monitors, multi gas monitors, continuous gas monitors and LEL monitors. Participants learn their limitations, the equipment's limits and common mistakes involved with gas testing.

H2S & OTHER TOXIC ATMOSPHERES

This half-day program teaches participants basic awareness of hazards created by a toxic atmosphere - H₂S is a common hazard. Physical properties, toxicity levels, initial response scales and case studies are covered with each participant team analyzing their own case.

RESPIRATORY PROTECTION

This half-day program gives participants basic knowledge in the use, care and maintenance of different types of respiratory protection, with emphasis on self-contained breathing apparatus (SCBA).

ON DEMAND

HAZARD ASSESSMENT & CONTROL

This half-day program provides basic knowledge and skills to identify and control work place hazards, analyze the risks, and apply control strategies to eliminate or reduce hazardous conditions and unsafe practices in the workplace.

THINK FIRST - H₂S & HAZARD ATMOSPHERES

This one-day program teaches individuals to recognize hazardous atmospheres and how to protect themselves in places where hazardous atmospheres may be present. Students will learn how a five step hazard assessment process to identify and control atmospheric hazards.

HYDRATE AWARENESS

This half-day program explains what a hydrate is and how hydrate formation occurs. Emphasis is placed on the prevention and detection of hydrates. Participants are led through CAPP guidelines on hydrate handling, and learn of an actual case incident in which a fatality occurred due to a hydrate.

ON DEMAND

OCCUPATIONAL HEALTH & SAFETY

This half-day program introduces the OH&S outline and participants are given a copy of the OH&S Act, Regulations and Code to use. This course is aimed at ensuring that employees know that they – along with their employers – are responsible for the regulations.

PROACTIVE DRIVER TRAINING

This one-day informative program includes three hours of classroom and four hours of actual in-vehicle training. The classroom portion uses a full multimedia display that provides participants with the most up-to-date information available on automotive safety.

GROUND DISTURBANCE LEVEL I®

This half-day program worker based program is designed to ensure personnel are aware of the hazards and necessary precautions working around ground disturbances. Participants taking this course are always expected to be under the direct guidance of a Ground Disturbance Supervisor with Level II® certification on site.

ON DEMAND

SAFE EXCAVATING AND TRENCHING

This half-day theory-based program highlights the components of undertaking a trenching or excavation activity. The program is designed to ensure that personnel are familiar with and fully understand all regulations involved when trenching or excavating activities take place.

DELIVERY OPTION MOBILE TRAINING CENTRE

DELIVERY OPTION

MOBILE TRAINING CENTRE

- State of the art classroom technology (smart boards, video feedback to monitors during live evolutions, live training aids).
- Client specific or Open Modular training programs based on the success of the industry renowned Safety 2000 program.
- Unique simulators that can be modified, providing different scenarios that more closely replicate your specific site needs; Fire Fighting, Confined Space, Fall Protection, Respiratory Protection, Gas Testing and more!
- Enhance our existing partnership with our clients by providing increased flexibility in their training needs.
- Save your company money by saving time, wages and travel costs by delivering on-site training.

Since 1982, Global has been the provider of choice for the majority of the oil and gas producers throughout the world and has assisted thousands of clients in all aspects of safety training.

Our program development ranges from core safety programs and codes of practice to management, mentorship and operational excellence initiatives.

Global has decades of experience in developing materials that fit the industry, the culture and the demographics of our clients.

Our experience ranges from: the building and development of industry-specific training schools where the learning is taken to the experiential level and skills are practiced for competency, standards and internal development of HSE teams, theory, practical, online and blended learning programs, to the everyday business of program development.

Global has been chosen to provide safety training and leadership programs to hundreds of thousands of people, all with diversified competency requirements, multiple languages and varied corporate cultures and safety objectives.

We are truly a “Global” company, with our influence felt on every continent (except Antarctica), and every year delivering, developing or translating hundreds of programs.
